Alexander Jones
DESIGN

PRODUCTSHEET

MATERIAL | MAINTENANCE | TIPS

The furniture from the Alexander Jones Design collection is made of oak veneer in the color “charcoal” black.
The metal frames, handles and details are made of stainless steel galvanized in a matte brushed brass finish.

The tops of the items with marble pattern are made of ceramic.

For maintenance we recommend to use a nearly dry cotton cloth to clean both the frame and the top. We strongly advise against cleaning agents which contain solvents and/or abrasives. These can damage the veneer and metal and cause scratches.

Remove stains as soon as possible by dabbing (not rubbing) with kitchen paper or an absorbent cloth.

Above mentioned simple tips will ensure that you will enjoy your Alexander Jones Design furniture for years to come.
