PLASTER

Care & Maintenance Instructions

Clean spills immediately
Dab spills with a dry white cloth to prevent spreading or staining. Follow up with a lightly damp cloth.

Avoid harsh chemicals
Do not use alcohol-based, solvent, or silicone-based cleaners. These can damage the coating and affect the appearance.

Use soft materials
Dust regularly with a soft, dry cloth. For deeper cleaning, use a soft cloth dampened with a mild soap solution.

Protect from heat and moisture
Always use coasters, placemats, or tablecloths. Avoid placing hot pans, cold drinks, or damp items directly on the surface.

Prevent damage from objects
Do not use sharp objects directly on the surface. Avoid dragging or dropping heavy items, and keep makeup, perfume, and other chemicals away.

Indoor use only
This item is intended for indoor use only. Outdoor conditions may damage the finish.

Scratch sensitivity
Protect surfaces from scratches with soft pads, cloths, or coasters. Do not sit or stand on the furniture unless specified.

Professional repair for damage
In case of serious stains or damage, consult a professional for restoration.

By following these care tips, your handcrafted plaster furniture will maintain its unique beauty for years to come
