METAL

Care & Maintenance Instructions

Regular cleaning
Dust and grime can accumulate on metal surfaces. Wipe regularly with a soft, dry cloth to maintain its appearance and prevent buildup.

Protect against rust
Metal can be prone to rust, especially in humid environments. Keep surfaces dry and consider applying a protective coating to prevent oxidation.

Use soft materials
Clean with a soft microfiber cloth or non-abrasive brush. Avoid steel wool or rough scrubbing pads, as they can scratch the surface and expose the metal to rust.

Avoid harsh chemicals
Do not use strong cleaners or corrosive substances, as they may damage the finish and lead to deterioration. Stick to mild, non-abrasive cleaning solutions.

Prevent exposure to harsh elements
Prolonged exposure to moisture, extreme temperatures, or direct sunlight can cause rust and fading. Use protective covers or keep metal furniture indoors when not in use.

Indoor use only
This product is designed for indoor use. Outdoor exposure can lead to damage over time.

Scratch sensitivity
Use placemats or coasters to prevent scratches. Avoid dragging sharp or heavy objects across the surface.

By following these simple steps, your metal furniture will remain in excellent condition for years to come.
