MIRROR

Care & Maintenance Instructions

Clean spills immediately
Dab spills with a soft cloth to prevent spreading and avoid streaks.

Use soft materials
Clean with a microfiber cloth and a light mist of mirror-safe cleaner or water. Avoid excessive moisture.

Protect from extreme conditions
Sudden temperature changes can cause moisture buildup, leading to water spots. Keep mirrors away from heating vents, fireplaces, and other sources of intense heat or cold airflow.

Dust regularly
Wipe with a soft, lint-free cloth to remove dust without scratching the surface.

Spot cleaning
Use a reputable, mirror-approved glass cleaner. Lightly rub the affected area with a soft microfiber cloth. Avoid excess friction or abrasive materials, as they can scratch the mirror.

Prevent heavy impact
Mirrors can chip or crack. Avoid dropping or dragging heavy objects across the surface.

Indoor use only
This product is for indoor use. Outdoor exposure can cause damage.

Scratch sensitivity
Use placemats or protective padding when placing items near mirrors. Avoid sharp or heavy objects that may cause scratches.

By following these simple steps, your mirror will remain clean and reflective for years to come.
