Drawer Press Operation Guide

This guide is used to instruct the correct pressing method for opening the drawer and handling abnormalities, please follow the steps below:

I. Routine Opening Methods (Either Method Works)

1. Press both sides of the drawer with both hands at the same time, and the drawer will pop out automatically.
2. Press the middle of the drawer with your palm, and the drawer will pop out automatically.

II. Abnormality Handling (Tilting When Pressing One Side)

If the drawer tilts and fails to pop out normally when pressing one side, please handle it according to the following steps:

1. Press the other side of the drawer to reset the tilted drawer;
2. After resetting, press the drawer again (you can choose any of the above routine opening methods), and it will pop out normally.

Warm Reminder: Please use moderate force during operation to avoid damaging the drawer due to excessive force.
