

PU LEATHER

Care & Maintenance Instructions

Clean spills immediately
PU leather (polyurethane leather) is a synthetic material. Blot spills immediately with a clean cloth or paper towel to prevent absorption.

Avoid harsh chemicals
Do not use harsh chemicals, bleach, or abrasive cleaners, as they can cause damage or discoloration.

Use soft materials
Clean with a soft microfiber cloth. For light stains or dirt, use a mild soap solution (such as diluted dish soap) and a soft cloth. Rinse with a clean, damp cloth and dry thoroughly.

Protect from heat and moisture
Use coasters or heat-resistant mats under hot items. Avoid placing wet or damp objects directly on PU leather.

Protect from sunlight
Direct sunlight can cause fading and brittleness over time. Keep PU leather furniture away from windows or use curtains and blinds to reduce UV exposure.

Dust regularly
Wipe the surface with a soft, damp cloth to remove dust and dirt.

Indoor use only
This product is for indoor use. Outdoor exposure can cause damage.

Avoid sharp objects
Sharp objects can puncture or scratch PU leather, leaving visible marks.

Scratch sensitivity
Use placemats or tablecloths to protect against scratches. Avoid sharp or heavy items on the surface.

By following these simple steps, your PU leather furniture will remain stylish and well-maintained for years to come.
