METAL FURNITURE PRODUCTS USE MANUAL

WE PROVIDE THIS INSTRUCTION TO GUIDE YOU HOW TO MAINTAIN AND CLEAN METAL PRODUCTS.

Warning:

- Do not place very hot or very cold items on the glass surface unless adequately thick tablemats are used to prevent such items coming into contact with the glass.
- Do not sit or stand on the glass or metal surface.
- Do not use the glass or metal as a chopping surface. Do not strike the glass or metal with hard or pointed items.
- Use gloves when unpack,install or move the plating product.
- When cleaning glass panels use a damp cloth or leather with washing up liquid(for glass); do not use washing powders or any other substances containing abrasives since these substances scratch glass.

Care:

- Please avoid dragging articles across the surface.
- Keep dry and far away from any liquid.
- To avoid scratching the glass or metal please remove rings when cleaning.
- Stay away from any acid and alkali. If you do spill anything on the metal wipe it off at once using a clean damp cloth then dry off with a clean dry cloth.
- Do not overload the product.
- Avoid dropping heavy items or striking the edges with an object such as a vacuum cleaner handle. Toughened glass will shatter if impacted by a heavy sharp object.
- Use dry microfiber cloth with talcum powder to clean the metal.
