FABRIC

Care & Maintenance Instructions

Clean spills immediately
Blot (do not rub) spills with a clean cloth to prevent spreading. If needed, use a mild fabric cleaner, testing it on a hidden area first.

Keep away from heat sources
Avoid placing fabric furniture near radiators, fireplaces, or direct heat sources to prevent fading or damage.

Dust regularly
Use a soft brush to remove dust and crumbs, helping to maintain the fabric's appearance.

Prevent stains and dirt buildup
Keep food and drinks away from fabric surfaces. Ensure the fabric stays dry to prevent mold and mildew.

Indoor use only
This product is for indoor use. Outdoor exposure can cause damage.

By following these simple steps, your fabric furniture will remain fresh and well-maintained for years to come.
